

Senior Structural Engineer / Manager

We are:

A Multi-disciplined, award winning industry leader, comprising a talented team of Engineers, Draftsmen, Project Managers, Estimators, Fabricators and Administration Staff, steadily growing in size to now number over 80 staff across our five locations.

idec is more than just a remarkable place to work

With a dynamic leadership team recognising individual needs while applauding team efforts, **idec** is perfectly poised to capitalise on an enviable history of completed projects and recent key acquisitions. Now we are on the look-out for other great people to join us as we continue to succeed!

You are:

Degree qualified in Civil / Structural Engineering
Preferably experienced in the construction of industrial and commercial buildings
From either an engineering consultancy or contractor background
Seeking to lead a team

The Role

Based at our Murarrie Head Office you will be responsible for all facets of the design and documentation process. **idec** offers clients a total building service from design through all facets of fabrication and construction. If you seek increased levels of autonomy, want the opportunity to explore innovative solutions and have a desire to see your ideas implemented, we would like the opportunity to discuss this role with you. Significant growth is anticipated in this role, therefore we are seeking someone whose individual goals complement ours, particularly with a view to moving "up the ladder".

The Rewards:

Outstanding package tailored to the right applicant involving any of:

Base Salary
Participation in our Performance Incentives Scheme (after Qualifying Period)
Superannuation
Yearly, performance based review
